Retail Price vs Discount (%)

KEY INSIGHTS

Clothing contributes nearly one-third of catalogue listings, indicating intense competition within the fashion segment.

Nearly half of all products are priced below ₹500, reinforcing Flipkart's strong mass-market positioning.

Most products receive discounts between 40-60%, with an overall average discount of 39.41%.

Approximately 29% of products lack brand information, reducing the reliability of brand-level analysis.

Only 10% of products contain rating information, limiting confidence in customer satisfaction analysis.

Business Recommendations

● Improve Brand Metadata

Nearly one-third of products have missing brand information.

● Increase Rating Coverage

More customer reviews will improve product quality analysis.

● Review Pricing Strategy

High discounts across many products may indicate inconsistent MRP pricing.
